

I don't believe that would handicap us truck drivers and the American public in such away by taking away the XM's and all of the information that goes with them. We appreciate the news as well as weather reports. We really appreciate the cities traffic reports as we are able to avoid conjestion and traffic jams instead of contributing to them. Please explain how that would not help the public in general. We are also alerted to kidnapping very quickly and other serious matters much quicker than before if at all. The XM helps to relieve boredom and keep our minds fresh and alert for better and safer roads. It keeps us up to date on current laws as well. I can not imagine anyone denying the public access to anything that promotes SAFTEY.

Thank You and please really consider and use your heads wisely.
